

MUSTAFA MOIN

Full Stack Developer | Digital Products and AI-Enabled Solutions

Target Role: Digital Products and AI Internship

Karachi, Pakistan | +92 343 3083198 | mustafamoin061@gmail.com

linkedin.com/in/mustafamoin | github.com/MustafaMoin | mustafamoin.netlify.app

PROFESSIONAL SUMMARY

Final-year Computer Science student and full stack developer with hands-on experience in digital product design, AI-enabled tools and data-driven systems. Designed, built and deployed six end-to-end digital platforms integrating large language models, REST APIs, analytics dashboards, multilingual and inclusive interfaces, and privacy-by-design data protection. Strong interest in digital transformation, AI and data governance. Seeking an internship in digital product design, build and management, contributing to inclusive and responsible digital, AI and innovation solutions.

EDUCATION

Bachelor of Science (B.S.) in Computer Science

Expected 2026

Indus University, Karachi, Pakistan | Final academic year of a bachelor's degree programme

Languages: English (Fluent), Urdu (Native)

CORE COMPETENCIES

Digital Product Design and Management | Product Requirements and Scoping | AI Tool Development | LLM Integration | Data Analytics and Visualization | Dashboards and Reporting | Database Management | Data Governance and Responsible Data Use | Technical Documentation | Inclusive and Multilingual Design | Analytical Problem Solving | Independent and Collaborative Work | Delivering Quality Work to Deadlines

TECHNICAL SKILLS

Product and AI: Digital product design, product requirements, user flows, AI tool development, LLM integration (Groq, Gemini, OpenAI), LoRA fine-tuning, machine learning (scikit-learn), technical documentation

Frontend: React, React Native, Expo, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Vite, responsive and multilingual (i18n, RTL) interfaces

Backend and APIs: Python, FastAPI, Flask, Node.js, Express.js, RESTful API design, webhooks, payment integration (Stripe, Safepay)

Data and Databases: PostgreSQL (Supabase), MongoDB, SQL, database design, data modelling, data validation, analytics dashboards and data visualization (Recharts, Chart.js)

Security and Data Protection: JWT, OAuth, Supabase Auth, OTP verification, role-based access control, Row Level Security, consent management, data retention policies, audit logging

Tools and Platforms: Git, GitHub, GitHub Actions (CI/CD), Docker, Vercel, Render, Netlify, Supabase, Postman

PROFESSIONAL EXPERIENCE

Freelance Web and Mobile Developer

Present

Self-Employed | Karachi, Pakistan

- Collaborate with clients to define product requirements and deliver web and mobile applications end to end, from design and development to deployment.
- Produce technical documentation, communicate with clients and manage multiple concurrent projects and deadlines independently alongside a full-time degree programme.

PROJECTS

SisGo: Women-Only Ride-Hailing Platform

2026

Full Stack Developer | React Native, Expo, TypeScript, FastAPI, Supabase (PostgreSQL), React

- Designed and built a three-component platform (mobile app, backend API, administrative panel) centred on safety, privacy and gender inclusion, with phone OTP authentication and identity verification.
- Implemented 162 REST API endpoints and a 30+ table PostgreSQL database with Row Level Security, role-based permissions, two-person approval for high-risk actions and a full audit trail.
- Applied privacy-by-design and responsible data use: five-type consent management in English and Urdu, a 72-hour retention policy for sensitive identity documents, and data export and account deletion.
- Validated with 61 unit tests and 106 end-to-end tests.

TAYBEX: AI-Enabled Multilingual Market Intelligence Platform <i>Founder and Lead Developer React, Vite, FastAPI, Python, Supabase (PostgreSQL)</i> - Designed, built and launched a live SaaS platform delivering AI-assisted, Shariah-compliant market intelligence, with tiered subscriptions and an administrative console. - Engineered a 13-stage decision pipeline with data-quality validation and an 8-layer ethical screening engine using LLMs (Gemini, Groq, OpenAI) to return structured, explainable classifications. - Developed a FastAPI backend with 100+ REST endpoints, role-based access control, real-time data streaming and payment webhooks with signature verification (Safepay). - Delivered an inclusive interface in six languages with right-to-left support and consent gating; built analytics dashboards, a public performance scoreboard and monthly reports.	2026
TripMate AI: AI-Powered Travel Planning Platform <i>Full Stack Developer React, TypeScript, Node.js, Express.js, MongoDB, Stripe, Groq, Gemini</i> - Built and deployed a full stack SaaS platform using LLMs (Groq Llama 3.3 70B with Gemini fallback) to generate personalized itineraries, hotel recommendations and map links. - Fine-tuned Llama 3.2 3B with LoRA (Unsloth) on a custom 200-example dataset. - Designed a multi-role system (traveler, hotel, vendor, administrator) with 8 REST API modules, JWT authentication, Stripe payments and an administrator dashboard for approvals, revenue reporting and audit logging.	2026
PhishingHunter Elite v2.0: ML-Powered URL Risk Scoring Platform <i>Full Stack Developer Python, Flask, scikit-learn, MongoDB Atlas, Docker</i> - Built and deployed a web application and public REST API that scores URLs from 0 to 100 using 14 weighted signals blended with a Random Forest model. - Integrated Google Safe Browsing, VirusTotal and WHOIS APIs with a 31,564-URL dataset; implemented MongoDB caching to reduce external API calls. - Developed an administrative dashboard with Chart.js analytics and a user feedback loop to track model errors.	2026
REGALIA: Full Stack E-Commerce Platform <i>Full Stack Developer Node.js, Express.js, MongoDB, JWT</i> - Built a fashion e-commerce application with a customer storefront and separate administrative panel, supported by 8 RESTful API modules. - Implemented JWT and bcrypt authentication, OTP-based guest verification, transactional emails and automated order confirmations.	2026
OOP Master: Cross-Platform Mobile Learning App <i>Full Stack Developer React Native, Expo Router, TypeScript, Supabase</i> - Developed an Object-Oriented Programming learning app with lessons, quizzes, bookmarks, progress tracking and an in-app C++ practice compiler. - Implemented Supabase Auth (email, Google sign-in, password reset) and modelled user data in PostgreSQL with Row Level Security.	2026
